

**Pulmonaria x 'Shrimps on the Barbie'**

Lungwort

Shrimps on the barbie down under or deep pink tubular flowers dangling in profusion above white-spotted foliage in the Mid-Atlantic?

Blooms appear in spring on 10" tall deer resistant foliage. Plant in well-drained soil.

PP#28646

Plant 18" apart.

Photo courtesy of TERRA NOVA® Nurseries, Inc.

Zones 4 - 9

**Pulmonaria x 'Trevi Fountain'**

Lungwort

Stunning deep cobalt-blue flower clusters are carried above the heavily silver-spotted dark green foliage in April and May. The parentage of P. longifolia makes this lungwort a good choice for hot humid southern climates. Foliage fills out quickly in the partly shaded garden and grows to 12" tall. Plants must be provided well-drained soil or will rot, especially in wet winters. PP#13047

Plant 18" apart.

Zones 4 - 9

**Pycnanthemum muticum**

Clustered mountainmint or Blunt mountainmint

No butterfly garden should be without this fragrant native mountainmint. The medium green foliage with silvery bracts is topped with pinkish-white flowers in July through September and reaches a height of 2-3'. A native nectar source for many butterflies, plant in part shade or full sun with consistent moisture.

Plant 12-18" apart.

Zones 4 - 8

**Rodgersia aesculifolia**

Rodger's Flower/Fingerleaf Flower

The big leaves on this unique specimen plant are shaped like those of the horse chestnut tree and are dark green with some bronzy overtones. The airy panicles of creamy white flower clusters can be 1-2' in length during July and August. Figure the mature plant height at 3-6' with about a 5' width, so give it room to look its best.

Plant 5' apart.

Zones 5 - 8

**Rosmarinus officinalis 'Arp'**

Hardy Rosemary

Exceptionally hardy, this Rosemary has shown it can survive to 0 degrees Fahrenheit. Dark green needle-like foliage is shrub-like and very aromatic.

Pale purple flowers may appear in summer to fall. 'Arp' can reach up to 3-6' over several seasons and is valuable used as a hedge or single specimen. Good drainage is a must.

Plant 36" apart.

Zones 6 - 8

**Rudbeckia fulgida 'Goldsturm'**

Black-eyed Susan

Perennial Plant of the Year 1999

Certainly one of America's favorite native perennials, and MARYLAND'S STATE FLOWER, this 2' beauty has golden yellow flowers 3-4" across with a black cone, and blooms from July through September. It is easy to grow, long-lived, makes a great cut flower, and handles any soil. Try it with Fountain Grasses, Feather Reed Grass, and Salvia 'Blue Hill'. Plant 18" apart.

Zones 4 - 9 Cultivar

**Rudbeckia fulgida 'Little Goldstar'**

Dwarf Black-eyed Susan

Winning over many with its compact, well-branched foliage, uniformity, and incredible flowering habit. Grows to just 14-16" tall and produces an abundance of the same 2-2.5" golden yellow flowers on a single scape than its taller competitor. Produced by tissue culture for more uniformity than 'Goldsturm'. PP# 22397

Plant 15" apart.

Zones 5 - 10 Cultivar

**Rudbeckia fulgida var. deamii**

Black-eyed Susan

A Southeast U.S. native that some in that region are quite proud of, and with good reason! In July, masses of 3' stems are topped with vibrant yellow black-eyed Susan flowers that are 1-2" across. Blooms atop sturdy well-branched stems continue into late summer and are a welcome addition to a meadow planting or more formal setting.

Plant 24" apart.

Zones 3 - 9

### Rudbeckia fulgida var. fulgida Black-eyed Susan

Fast growing with shiny, more elongated lobed leaves than 'Goldsturm', this native has **orange-yellow** ray petals with a brown center. It blooms from late July into October, (a good six weeks longer than 'Goldsturm'), and grows **24-30"** tall. Colonies form quickly in rich loose soil. Butterflies enjoy this Rudbeckia as well. **Plant 18" apart.**

Zones 3 - 9    

### Rudbeckia laciniata 'Autumn Sun' Coneflower

Large **yellow** coneflowers stand boldly **5-6'** above the foliage in July and August, and are easy to grow in any fertile garden soil. This native perennial has great architectural qualities, and combines well with our tall grasses, Heliopsis, and 'Black Eyed Susan'. Butterflies love it, and you will too. **Plant 24" apart.**

Zones 3 - 9     Cultivar

### Rudbeckia maxima Coneflower

Here's a bold and exciting native plant that's perfect at the edge of your pond or stream. It has huge powder blue leaves **2-3'** tall from which flower spikes appear to **5-6'** in June and July with large deep **yellow** coneflowers. Blooming into September, it prefers deep, moist soil, but will thrive in average garden conditions as long as it's kept moist. **Plant 18" apart.**

Rudbeckia maxima at the Cylburn Arboretum

Zones 5 - 9     Cultivar

### Rudbeckia subtomentosa 'Little Henry' Dwarf Sweet Coneflower

A treasured addition in our black-eyed Susan collection, this shorter cousin to 'Henry Eilers' has the same distinctive quilled **yellow** petals surrounding a brown cone but at a more 'visible' height of **3-4 feet**. 'Little Henry' will remain sturdy and upright in the middle to back of the border displaying the long lasting flowers in August and September. PP#23590 **Plant 24" apart.**

Zones 4 - 8     Cultivar

### Rudbeckia triloba 'Prairie Glow' Brown-Eyed Susan

A must for the meadow or pollinator garden, the multitudes of vibrant **red** and **yellow** flowers will fade to **orange** and then bronze, with all three stages of blooms glowing at once. The show begins in July and continues into fall. Trim in early summer to keep the foliage on the shorter side of **24-40"**, if desired.

**Plant 18" apart.** *New for 2023*

Zones 4 - 8     Cultivar

### Rudbeckia x 'American Gold Rush' Perennial Plant of the Year for 2023

**Black-eyed Susan**  
A bounty of classic **golden yellow** flowers with black eyes appear from July to September on compact mounded foliage that grows **22-26"** tall. Leaves are smaller than its cousins and more hairy contributing to resistance to Septoria leaf spot even in humid conditions. Perfect for mass plantings or as a single specimen in the mixed border. A 2020 All-America Selections winner. PP#28498 **Plant 36" apart.**

Zones 4 - 9     Cultivar

### Sagina subulata

#### Irish Moss

Fast-growing evergreen Irish Moss forms a dense mat of cushiony green, soft enough for a Leprechaun to rest on. Surround stepping stones or fill in cracks and crevices in rock gardens. At 1-2", it even sports a mass of tiny fragrant white flowers in May-June. Give it ample moisture to grow in the sun, but it prefers bright shade. Alternate squares with Sagina 'Aurea' to create a chessboard for outside entertaining. Plant 10" apart.

Zones 5 - 8 F

### Sagina subulata 'Aurea'

#### Scotch Moss

Chartreuse moss-like foliage forms a carpet growing 1-2" tall. Very small white flowers will appear in late spring on the evergreen foliage. Give it ample moisture to grow in the sun, but it prefers bright shade. Excellent for filling in between stepping stones or in a rock garden. Sheer after blooming to prevent seed dispersal. Prefers moist well-drained soil. Plant 10" apart.

Zones 5 - 8 F

### Salvia Arctic Blaze® Purple

#### Autumn Sage

Since the 'Red' selection has such star power, (continuous blooms from spring to frost), and a compact well-branched habit we had to include 'Purple'. Improved winter hardiness for zone 6. Otherwise treat it as an excellent annual! Use with Achillea, Coreopsis and Verbena in the full sun border or in containers. Grows 24" tall and up to 36" wide. PP#28717 Plant 24" apart.

Zones 6 - 10 N Cultivar

### Salvia greggii

#### Arctic Blaze® Red

#### Autumn Sage

This greggii type boasts hardiness to zone 6 and strong stems. Cherry-red blooms appear from May to frost on loose, upright foliage with small leaves. The shrubby foliage grows 24" tall and 36" wide. Salvia greggii is classified as a sub shrub and is native to Texas. With a Texas heritage it is no wonder that it prefers dryish soil and full sun. PP#28620 Plant 18" apart.

Zones 6 - 10 N Cultivar

### Salvia lyrata

#### 'Purple Knockout'

#### Sage

The wide bronze-red leaves are tinged with green toward the center, are purple on the underside, and remain neat and tight to the soil surface. The stiff flower stems shoot up from the base to 3' with small blue-bronze flower bracts swirling up the stem. The blooms appear in June-July, turn bronzy-red, and keep their form well through the summer. Plant 18" apart.

Zones 5 - 9 N Cultivar

### Salvia nemorosa

#### 'Blue Hill'

#### Sage

Noted for it's long bloom time (June-July, and again in fall) and its lovely sky blue flowers. It has rough green foliage with numerous spikes of sky blue blooms rising a moderate 15" from the compact plant. Spent flowers should be cut back for a repeat performance in fall. Spectacular in a mass and with Coreopsis, Daylilies, Black Eyed Susan or Sedums. Plant 18" apart.

Zones 4 - 9 F

### Salvia nemorosa

#### 'Blue Marvel'

#### Sage

A combination of very stout violet-blue flowers spikes and a compact form will serve well in the front of the border where lots of color from early to late summer can be appreciated. Simply cut back after flowering to send up another round of blooms. Grows 10-14" tall. Drought tolerant once established. Plant 12" apart.

Zones 4 - 9 F

### Salvia nemorosa

#### 'Caradonna'

#### Sage

The glowing purple-black stems are unique on 'Caradonna'. Flower spikes to 24" are the same rich violet-purple of 'East Friesland', blooming often from May-July. Give this Salvia the well-drained sun-loving conditions it loves, and it will bloom its heart out for you. Great with Dianthus 'Firewitch', Perovskia 'Little Spire' and Stachys 'Silver Carpet'. Plant 18" apart.

Zones 4 - 9 F

### Salvia nemorosa

#### 'East Friesland'

##### Sage

Violet-purple flowers on numerous spikes start blooming in June and July to a height of 18". If deadheaded regularly, it will provide flowers again in September. Try it with a pink or white Dianthus and our Artemisia Silvermound for a cool, serene look in those dog days.

Plant 18" apart.

Zones 4 - 9     F 

### Salvia nemorosa

#### 'May Night'

##### Sage

##### Perennial Plant of the Year 1997

The most intense deep indigo-purple spikes imaginable rise to 18" above the rough green leaves in late May to July. Cut back after blooming and you will be rewarded with more of that rich purple color in early fall. It thrives in fertile, well-drained soil, and the color will knock your socks off.

Plant 18" apart.

Zones 4 - 9     F 

### Salvia nemorosa 'Rose Marvel'

#### Meadow Sage

Like its partner 'Blue Marvel', this sister Sage has long lasting repeat blooms from May to September. Compact at 10-12" tall with plump rose-pink spikes that will continue to impress all summer. Dead-heading is not required but appearance will be improved when accompanied by an occasional trim. PP#30118

Plant 12" apart.

Zones 4 - 9     F 

### Salvia nemorosa

#### 'Snow Hill'

##### Sage

No doubt 'Snow Hill' will rival 'Blue Hill' for usefulness and popularity among long-blooming hardy Salvias. This white densely spiked version has the same great attributes as 'Blue Hill', with a moderate size of 15", and blooms from June-July. A great companion to a wide range of perennials.

Plant 18" apart.

Zones 4 - 9     F 

### Salvia 'Tricolor'

#### Tricolor Sage

This upright perennial herb with tri-colored foliage and lavender blue flowers in summer will grow to 15-18" in sunny well-drained soil. Providing sufficient sunlight will insure the pink margins develop on the green and white variegated leaves. Leaves are fragrant and used for culinary purposes. Plant in the fragrant herb garden with Rosmarinus 'Arp', Santolina incana nana and Thymus 'Coccineus'.

Plant 18" apart.

Zones 5 - 9     F 

### Santolina incana nana

(syn. Chamaecyparissus var. nana)

#### Lavender Cotton

Low mounds of silvery-gray foliage at about 8" are semi-evergreen and produce yellow button-size flowers June through July. Give this perennial very well-drained soil, full sun, and a good hard clipping to about 4" in the spring to keep it bushy and neat. Very drought-tolerant. Same pleasant camphor-like fragrance as S. virens.

Plant 18" apart.

Zones 6 - 10   F 

### Santolina virens

(syn. S. rosmarinifolia)

#### Lavender Cotton

Little yellow lemon-drop-sized flowers nod on wiry stems over the soft green mound of foliage in June-July to 15" height. Thrives in heat and can handle average soil. Shear the plant back after flowering to preserve its shape. Try with other heat-tolerant perennials such as Artemisia, Lavender, and Sedum 'Autumn Joy'.

Plant 18" apart.

Zones 6 - 10   F

**Scabiosa columbaria**  
**'Butterfly Blue'**

Pincushion Flower  
Perennial Plant of the Year 2000

A classic among our customers, this is a heavy blooming easily grown perennial with a lavender blue color that is almost indescribable. It blooms from May through September on strong stems, especially if spent blooms are removed regularly. It grows 12–15" in height, prefers moist, well-drained, neutral to alkaline soil, and is useful in the border or as a cut flower. Plant 18" apart.

**Scabiosa columbaria**  
**'Pink Mist'**

Pincushion Flower

This bright pink version of the Pincushion Flower has the same 12–15" height and May–September bloom time as the blue version and the same strong stems above compact gray-green foliage. Outstanding as a cut flower, they should be cut when half open. Works well in small spaces. PP#08957. Plant 18" apart.

Zones 5 - 10

Zones 5 - 10

*Creeping Sedum*

**Sedum album 'Athoum'**

Stonecrop

Petite rounded dark green rosettes will spread in the rock garden or cascade in containers and offers a little more presence than the straight species. 6–8" tall foliage is adorned with light pink flower clusters in summer. Well-drained to dry soil is a must.

Plant 18" apart.

**Sedum caucicola**

**'Lidakense'**

Stonecrop

Mounds of round, blue to reddish bronze foliage are attractive at 12". Pink to rose clusters of flowers bloom in Aug & Sept. Combine it with Dianthus 'Bath's Pink' or 'Firewitch', Stachys, and Salvia 'Purple Rain' for cooling colors in our summer heat. Perfect for spilling over containers edges and rock gardens.

Plant 18" apart.

Zones 4 - 9

Zones 4 - 10

**Sedum dasyphyllum 'Major'**

Stonecrop

Adding to the palette of colors that creeping Sedums have to offer, this blue-leaved ground cover has tight steel blue succulent foliage that grows to 4" in height. This is a large leaved S. dasyphyllum, believe it or not, hence the name 'Major'. Well suited to hot, dry environments such as the full sun rock garden or on a green roof. White star-shaped flowers appear in early summer.

Plant 18" apart.

**Sedum floriferum**  
**'Weihenstephaner Gold'**

Stonecrop

This fine ground cover has fleshy, but fine-textured, green mounded foliage in the summer that becomes covered with lovely golden-yellow flowers in June and July to a height of 3–4". The foliage turns red in the fall. So useful as a ground cover for difficult dry slopes, and enchanting in the rock garden.

Plant 18" apart.

Zones 4 - 9

Zones 4 - 9

**Sedum kamtschaticum**

Stonecrop

It's a long way from the here to Kamchatka, never-the-less this Sedum is right at home in the mid-Atlantic rock garden. Creeping foliage of medium green succulent leaves with serrated edges reaches 4" in height and is covered with golden yellow flowers in early summer. Foliage turns bronze in the fall. Pair with Aster 'Blue bayou' and Dianthus Super Trouper™ Orange. Plant 12" apart.

**Sedum kamtschaticum**

**var. ellacombianum**

**'Cutting Edge'**

Variegated Stonecrop

The yellow-edge green leaves form rosettes that grow 6" tall and spread to 12". Yellow flowers appear in mid-summer. Prefers a little afternoon shade in hotter regions.

Plant 12" apart.

Zones 3 - 9

Zones 4 - 8

### Sedum makinoi 'Ogon'

#### Stonecrop

An unusual Japanese selection, preferring some afternoon shade and moderate moisture, the creeping golden-yellow foliage is tight to the ground at 2" and offers bright contrast in the rock garden or pathway. Teeny yellow-green flowers in mid-summer blend into the foliage almost unseen. Semi-evergreen for southern gardens, use in containers or as an annual north of zone 7.

Plant 8" apart.

Zones 7 - 9

### Sedum pachyclados

#### Stonecrop

Attractive rosettes of powder blue toothed leaves form a decorative cluster perfect for the rock garden or along a stone path. The 2" foliage is topped with pink star-shaped flowers in late summer. Plant in a dryish sunny location. Try with Achillea 'Oertel's Rose', Eryngium 'Blue Hobbit' and Festuca 'Elijah Blue'.

Plant 10" apart.

Zones 5 - 9

### Sedum reflexum

#### 'Blue Spruce'

#### Spruce Stonecrop

This sedum has bluish-green (spruce colored) linear, fleshy needle like foliage that forms a whorl around the stem. It has a yellow flower in the summer and grows about 6" tall. It is great for a rock garden or green roof. Perfect for the rock garden with Armeria 'Splendens', Campanula 'Blue Waterfall' and Coreopsis 'Citrine'.

Plant 16" apart.

Zones 4 - 9

### Sedum rupestre

#### 'Prima Angelina'

#### Stonecrop

Evergreen needle-like leaves are more intense golden-yellow and more compact than the ever popular 'Angelina'. This new star will grow to about 6" in full sun and well-drained soil. When the weather turns cooler, it remains bright gold but the tips of the leaves turn reddish-orange. PP#32414.

Plant 10" apart.

*New for 2023*

Zones 5 - 8

### Sedum sexangulare

#### Watch Chain Stonecrop

Durable, vigorous and perfect for the rock garden, this quick spreading groundcover has six spiral rows of small cylindrical bright green leaves and grows 4-6" tall. Often used on green roofs as well. Bright yellow flowers appear in summer and contrast well with rocks or pathways. Use with other drought tolerant plants such as Thymus, Teucrium and Delsoperma.

Plant 10" apart.

Zones 3 - 8

### Sedum sieboldii

#### October Plant/Stonecrop

Silvery blue scalloped foliage bears clusters of light pink flowers in late summer. The 6" height makes this cascading grower a lovely choice for the rock garden. Commonly called October Plant for its orange-tinged foliage in fall. Try with any Salvia and Leucanthemum.

Plant 18" apart.

Zones 4 - 9

### Sedum sieboldii 'Variegatum'

#### Variegated Stonecrop

This variegated form of the lovely fall blooming stonecrop has light blue and creamy white leaves that grow 6-8" in the garden or cascading in a container. Antique rose-pink blooms appear in fall on pinkish stems.

Plant 18" apart.

Zones 6 - 9

### Sedum spurium 'Fuldaglut'

Stonecrop

'Fuldaglut' has green-bronze foliage 3-4" high, that flowers deep red in July and August at that height. This small Sedum is enchanting in the rock garden, as a ground cover, or viewed close up in containers with other small varieties. Handles most any well-drained garden soil, even of low fertility. Considered an improved variety of 'Dragon's Blood' Sedum.

Plant 18" apart.

Zones 4 - 8

### Sedum spurium 'John Creech'

Stonecrop

Vigorous and mat-forming, the "Wizard of Oz" green fleshy, scalloped leaves grow in a whorl around the 2-5" tall stems. Tidy foliage is complimented with pink flowers in mid summer. Spreading quickly in hot dry soils, use in rock gardens, garden terraces, rock walls, and stone paths. Full sun is a must and poor soil is acceptable.

Plant 12" apart.

Zones 3 - 9

### Sedum spurium 'Voodoo'

Stonecrop

Put away the straight pins! Plant 'Voodoo' for its bold foliage color of mahogany-red and contrasting rosy-red flowers in summer. The spreading succulent foliage rises to 4-6" and will fill in quickly as a ground cover or along a stone path. Drought tolerant and very showy all season long. Use with Veronica 'Whitewater' and Allium 'Millenium'.

Plant 12" apart.

Zones 3 - 9

### Sedum spurium 'What a Doozie'

Stonecrop

Try new 'What a Doozie' for it's more reliable variegation! Creamy white and green foliage with a pink tinge in cooler months, this Sedum spreads with ease in the rock garden, spills effortlessly from containers, and performs well on green roofs. Foliage grows 2-5" tall.

PP#31789

Plant 15" apart.

*New for 2023*

Zones 5 - 9

### Sedum Sunsparkler® Series Stonecrop

These quick spreaders are tough survivors in heat and drought, once established, and are cold hardy as well.

'Dream Dazzler' has tri-colored leaves of pink, white and purple, transforming to smoky dark purple with bright pink margins. Grows 6-8" tall. Magenta-pink flowers bloom in fall.

*New for 2023*

'Lime Zinger' has rounded apple green leaves with a cherry red edging in cool temperatures and are topped with long blooming soft pink flowers.

'Wildfire' has rose-pink flowers on 6" tall foliage in late summer. Plant 18" apart.

PP#24632

Sunsparkler® 'Wildfire'  
PP#28621

Zone 4 - 9

### Sedum tetractinum 'Coral Reef'

Stonecrop

Leathery rounded bright green leaves take on a striking reddish-bronze color in fall. This vigorous stonecrop will form a thick mat in the driest of conditions and is an excellent choice for green roofs or the rock garden. Vivid yellow flower clusters cover the 4-6" tall foliage in summer. Tolerates light shade.

Plant 18" apart.

Zones 4 - 8

### Sedum ternatum Woodland Stonecrop

Native plant lovers don't miss this one. Sedum for shade...yes, for shade...with dark green succulent leaves and star-shaped white flowers in May. The 6" tall thick evergreen foliage is mat-forming and will do well up against tree roots, or when allowed to creep in the rock garden. Preferring moist soil, this low maintenance gem is for gardeners of all walks. Plant 12" apart.

Zones 4 - 9

*Upright Sedum*

Perennials

**Sedum spectabile 'Brilliant'**

**Stonecrop**

Similar to 'Autumn Joy' in height and usage with flowers that are **bright lavender pink**. Blooms in August through October. Flowers turn bronze and add interest in the winter garden. Grows **18"** tall. Looks great with Echinacea 'Pow Wow White', Achillea 'Pink Grapefruit' and Dianthus 'Firewitch'.

**Plant 18"** apart.

Zones 4 - 9   

**Sedum spectabile 'Neon'**

**Stonecrop**

Characterized by a brilliant **rosy-pink bloom** color even deeper and brighter than 'Brilliant', coupled with a compact height of **15"**, this popular Sedum blooms from August into October, and is quick to reach full size. Try with Echinacea 'Butterfly Kisses' and Veronica 'First Love' to represent pink in the garden all summer.

**Plant 18"** apart.

Zones 4 - 9   

**Sedum x 'Abbeydore'**

**Stonecrop**

Sturdy upright blue-green foliage is adorned with pink buds and **cerise-pink** flower clusters in late summer. Blooms open a little earlier than 'Autumn Joy' and age to antique rose before the dark red seed heads develop. Height is **14-18"**. Bees and butterflies love 'Abbeydore'. Use in the sunny border with Amsonia hubrichtii, Artemisia 'Powis Castle' and Aster 'Wood's Blue'.

**Plant 18"** apart.

Zones 3 - 9   

**Sedum x 'Autumn Joy'**

**Stonecrop**

A "Top 10" perennial for many years, broccoli-like buds appear in spring, turning to **pink** flower heads in August about **18"** above fleshy blue-green foliage. The flowers then gradually change to a rosy russet by late autumn, and are even appealing left uncut against a snowy winter landscape. Drought-tolerant, attractive to butterflies, used in masses as a ground cover, or in the border, it is truly a four-season perennial. Just a few amiable companions include Caryopteris, Coreopsis, the Fountain Grasses, Russian Sage, and Yucca. **Plant 18"** apart.

Zones 4 - 9   

**Sempervivum (Hens and Chicks)**

Zones 3 - 8  

Who isn't cheered by this classic old fashioned favorite? Easy to grow in a multitude of conditions, it is easy to account for the popularity of this sedum look-alike. New "chicks" form around the base of the plant, or "hen". Eventually the "hens" die out leaving the "chicks" to grow for the next year, and so forth. Perfect for the rock garden, trough or container, between sunny stepping-stones or clustered at the front of the border in lots of sun, don't forget these favorites of your grandmother. **Plant 6-10"** apart.

**Senecio aureus**  
(*Packera aurea*)  
Golden Ragwort or Groundsel

This native perennial wildflower is 12-16" tall and common to moist meadows and grassy edges of swamps. It prefers consistently moist, well drained soil in part shade; in more sun it will require more moisture. Golden yellow daisy-like flowers appear in early summer.  
Plant 10" apart.

Zones 4 - 9

**Sisyrinchium angustifolium**  
'Lucerne'  
Blue-eyed Grass

How can you resist blue eyes smiling at you? Delightful blue star-shaped flowers with a gold center bloom from May until July on Iris-like foliage that reaches only 8". A nice addition to the rock garden or edging for the garden path. Blue-eyed grass prefers well-drained soil in full sun but can tolerate some shade.  
Plant 12" apart.

Zones 5 - 8

**Solidago rugosa**  
'Fireworks'  
Goldenrod

For late summer color, this is an excellent native garden perennial. Arching wands of golden yellow September-October flowers are aptly named as they look exactly like the streaming fire trails that follow the star bursts lighting up our July 4th skies. This Goldenrod reaches a tidy 3-4' and prefers average to moist soil, but handles a range of growing conditions. Try it with other fall bloomers.  
Plant 18" apart.

Zones 4 - 9

**Solidago shortii**  
'Solar Cascade'  
Goldenrod

'Solar Cascade' will put on a stellar performance from late summer into fall with showers of golden-yellow flowers. This goldenrod was selected from a federally endangered species found only in remote areas of Kentucky and Indiana. Height is between 'Fireworks' and 'Golden Fleece' at 3'. Drought tolerant once established.  
Plant 18" apart.

Zones 3 - 8

**Solidago sphacelata**  
'Golden Fleece'  
Dwarf Goldenrod

Showy sprays of golden yellow flowers in late summer to fall and provide a great backdrop for other late blooming perennials like Asters. This native has nice textured dark green leaves that are more rounded or heart shaped and grows 18-24" tall.  
Plant 18" apart.

Zones 4 - 9

**Spigelia marylandica**  
'Little Redhead'  
Indian Pink

This spectacular native is a delight to hummingbirds and quite showy when massed at the woodlands edge. 'Little Redhead' is an excellent uniform selection with the trademark dark red tubular flowers with yellow interiors in late spring to mid-summer. Late to emerge in spring. Prefers consistent moisture and requires well-drained soil. Grows 24-28" tall. Plant 24" apart.

Zones 5 - 9

**Stachys byzantina**  
'Helene von Stein'  
Lamb's Ear or Big Ears

The larger, vigorous, woolly gray leaves of this variety are effective massed in the foreground of a bed or as edging. It resists languishing in our humid weather, seldom flowers, and at 10" in height, is a strong clump grower that can form a 3' wide plant in 2 years. Does best in poor, very well-drained soil.  
Plant 20" apart.

Zones 4 - 9

**Stachys byzantina**  
'Silver Carpet'  
Lamb's Ear

Same delightful velvety silver leaves as other byzantinas that invite touching (children love it), but a non-flowering, low-maintenance form at 5 - 7". Try it with other drought-lovers such as Lavender, Sedum 'Autumn Joy', and Dianthus 'Firewitch'.  
Plant 20" apart.

Zones 5 - 9

### Stachys monieri 'Hummelo'

Perennial Plant of the Year 2019

#### Alpine Betony

Textured dark green leaves form a clumping mound from which numerous upright 24" tall flowering spikes arise. Long blooming bottle-brush shaped clusters of lavender-rose top the spikes for weeks in early to mid-summer. Combine with Achillea 'Moonshine', Coreopsis 'Polaris', Echinacea 'PowWow White', Geranium 'Rozanne' and Pennisetum orientale. Prefers average, well-drained soil.

Plant 18" apart.

Zones 4 - 8

### Stokesia laevis 'Color Wheel'

#### Stokes Aster

An old-fashioned garden perennial. 3" flowers open white on branched bloom stems, then fade to lavender, followed by dark blue-purple, maintaining three to five different color flowers all at one time. Bloom stems reach 18-24". Try it with purple Salvia, hardy Geraniums, and Siberian Iris. PP#12718.

Plant 18" apart.

Zones 5 - 8

### Stokesia laevis 'Mel's Blue'

#### Stokes Aster

The sturdy upright stems hold a profusion of large periwinkle-blue blooms for most of the summer. This Stoke's Aster is a bit shorter than 'Peachie's Pick' at 18-20" tall, and a perfect choice for the cut flower, native, or cottage garden. Combine with summer Phlox, Coreopsis, and Achillea. PP# 23090.

Plant 18" apart.

*New for 2023*

Photo courtesy of Plants Nouveau

Zones 5 - 8

### Stokesia laevis 'Peachie's Pick'

#### Stokes Aster

Not only are clumps dense and tight, but the densely compact upright flower spikes are topped with dozens of large blue flowers from late June to early July. The deep green foliage remains attractive all season growing to 18" tall. 'Peachie's Pick' occurred as a seedling in Peachie's garden and, due to her generosity, the rest is history.

Plant 18" apart.

Zones 5 - 9

### Thymus citriodorus

#### 'Doone Valley'

#### Creeping Thyme

A low spreading, evergreen thyme which has golden variegated foliage, colorful flowers & a great lemon scent. Blooms are clusters 3"- 4" with tiny pinkish purple flowers. Leaves are very bright in the cool of spring. Plants are 4 - 5". Excellent for edging, rock gardens & around and between stepping stones.

Plant 6" apart.

Zones 4 - 9

### Thymus praecox

#### 'Pink Chintz'

#### Creeping Thyme

'Pink Chintz' is one of the first Thymes to flower, blooming from May - July. It is a vigorous ground hugging grower with small gray-green leaves that are small, strongly scented and fuzzy. Profuse pink blooms cover the 1"- 2" high foliage.

Plant 6-8" apart.

Zones 5 - 9

### Thymus pseudolanuginosus

#### Woolly Thyme

Tiny felted gray leaves form a low cushy mat to a height of 2-3" with occasional tiny pink flowers in summer. A drought tolerant evergreen ground cover, Thyme is perfect as a low maintenance lawn substitute, in the rock garden, or planted between stepping stones. Provide full sun and well drained soil, avoiding wet feet at all times.

Plant 6" apart.

Zones 5 - 9

### Thymus serpyllum

#### 'Coccineus'

#### Red Flowering Mother of Thyme

Tiny glossy green leaves are mat forming at 3". This groundcover is perfect for rock, trough, and alpine gardens, works between pavers, and has rosy-purple flowers in mid-summer. Excellent drainage and lots of sun are a must. Too much rain can be detrimental; water has a hard time evaporating from the leaves causing fast rot.

Plant 6" apart.

Zones 5 - 9

Gold = Sun, Green = Shade

### Thymus serpyllum 'Elfin'

Elfin Thyme

Imagine dwarfing other creeping Thyme? The teeny tiny aromatic leaves form a tight carpet to 1" and produce lavender flowers in summer, gradually filling in between rock crevices or stepping stones. Attractive cascading out of containers filled with other perennial or herbs, 'Elfin' is evergreen and tolerant of poor sandy soil. Excellent drainage is a must and full sun is preferred.

Plant 6" apart.

Zones 5 - 9

F

### Thymus vulgaris 'Silver Posie'

Variegated English Thyme

'Silver Posie' adds a sweet touch to any container or cottage garden with its white edged gray-green leaves and tiny lavender-pink flowers in late spring and early summer. Aromatic foliage is a bushy 10-12" tall and is evergreen in warmer climates. Cool weather brings a hint of burgundy to the leaves.

Plant 12" apart.

Zones 6 - 9

F

### Tiarella cordifolia 'Brandywine'

'Brandywine'

Foam Flower

The puffy, tiny white flowers are carried on short spikes on 8" stems. Native Tiarella is an ideal as a spreading ground cover for shade. Tiarellas have dark green, quite evergreen leaves that vary in leaf shape and coloration according to variety. 'Brandywine' has just a bit of burgundy veination on its leaves and blooms white in April and May. Plant 18" apart.

Zones 5 - 9

Cultivar

### Tiarella cordifolia 'Elizabeth Oliver'

'Elizabeth Oliver'

Foam Flower

The deeply lobed leaves are bright green with faint burgundy veination. As the cooler days of early October arrive, the leaves take on a rich purple hue, but when spring is upon us, expect creamy white flowers with a pink blush in April and May about 8-10" above the evergreen foliage. This vigorous grower for the woodland or shade garden is another native that will make a great groundcover. Plant 18" apart.

Zones 4 - 8

Cultivar

### Tiarella cordifolia 'Oakleaf'

'Oakleaf'

Foam Flower

As its name implies, native 'Oakleaf' has dark green leaves that are lobed with a serrated edge like those of the tree, and grow in dense, fast-growing clumps. The flowers on their little spikes are a pink and are very profuse in May to a height of 8-10". Try Tiarellas with Ajuga, Epimedium, or ferns for variety in form and texture.

Plant 18" apart.

Zones 4 - 8

Cultivar

### Tiarella cordifolia 'Running Tapestry'

'Running Tapestry'

Foam Flower

Woodland gardeners with large areas to cover would do well to consider this fast-spreading native ground cover. The evergreen leaves are somewhat heart-shaped and have a serrated edge. Best of all is the lovely burgundy marbling, which radiates from the midrib outward throughout each leaf. The masses of white foam flowers appear about 12" above the foliage in April through May. Plant 18" apart.

Zones 4 - 8

Cultivar

### Tiarella x 'Timbuktu'

'Timbuktu'

Foam Flower

Massed in the woodland garden, the mysterious beauty of 'Timbuktu' can be appreciated up close and from afar. Loose layers of elongated, finely dissected leaves have brownish-bronze veining and are topped with floating airy white bottlebrush flowers in spring. Grows 10-12" tall and prefers rich, moist soils.

Plant 12" apart.

Zones 4 - 9

Cultivar

### Tradescantia x 'Concord Grape'

'Concord Grape'

Spiderwort

Violet-purple flowers bloom in summer against bluish-green strap-like foliage that grows 12-18" tall. Buds appear in clusters and only one flower in each cluster blooms at a time, each lasting a day. Prefers moist, rich soil in partial shade. Trim mid-season to encourage a new set of blooms.

Plant 18" apart.

**Tradescantia andersoniana**

**'Sweet Kate'**

**Spiderwort**

Truly iridescent yellow foliage at 24" w/ brilliant gentian blue flowers is such a visual blast, we are compelled to offer this Spiderwort that can't help but brighten the shade garden. Expect flowers in June and July. Combine with Sedum 'Autumn Joy', Rudbeckia 'Little Gold Star' and Veronica 'Royal Candles'.

Plant 18" apart.

Zones 4 - 9

Cultivar

**Tricyrtis formosana**

**'Samurai'**

**Toad Lily**

Late summer purple orchid-like flowers with dark purple speckling and yellow throats appear like small fairy-tale warriors making a stand on green and golden-edged variegated foliage. This compact variety grows to 12-18" tall and appreciates a trim mid-season to encourage branching. Prefers well-drained soil with plenty of organic matter.

Plant 18" apart.

Zones 6 - 8

**Tricyrtis x 'Sinome'**

**Toad Lily**

Among the most striking of woodland plants for the shade gardener, this Toad Lily's orchid-like flowers magically appear from late August into October. An old-time cultivar, its upright-facing white flowers have ruby speckling and form a nice 3' clump. Recommended for its drought tolerance and clean, shiny, dark green leaves. Be sure to choose a site where these lovely flowers can be appreciated, as they are not showy from a distance.

Plant 18" apart.

Zones 4 - 8

**Verbascum x 'Dark Eyes'**

**Mullein**

Eye-catching 12" spikes rise from woolly gray-green foliage and produce creamy yellow flowers with dark maroon centers. Short stature, lengthy bloom time and being a short-lived perennial makes this an excellent choice for containers. Blooms begin in late spring and will continue to bloom through the summer. Requires well-drained soil.

PP#16986.

Plant 12" apart.

Zones 5 - 9

**Verbascum x 'Plum Smokey'**

**Mullein**

This mullein forms a lovely upright arrangement of mauve-purple flowers on 16-18" spikes. The blooms appear from mid-spring to mid-summer above a rosette of fuzzy gray-green foliage. Short stature, lengthy bloom time and being a short-lived perennial makes this an excellent choice for containers. Requires well-drained soil.

PP#16156

Plant 15" apart.

Zones 5 - 9

**Verbena bonariensis**

**Tall Verbena**

A 'wild' look is had by this tall, stiff, widely branched Verbena with 3-4' stems that are topped with small purple flower clusters. Excellent used in the middle of the border with its open airy appearance. Pinch the first few shoots in spring to encourage branching. Blooms throughout the summer and is butterfly magnet.

Plant 18" apart.

Zones 7 - 10

**Verbena EnduraScape™ Series Vervain**

Zones 7 - 10

The EnduraScape Series combines unmatched summer performance and heat tolerance with excellent branching, powdery mildew resistance, and improved winter hardiness. Blooms from early spring to fall and grows 8-12" tall. Plant 24" apart.

**Verbena canadensis**  
**'Homestead Purple'**

**Vervain**

Few plants bloom so extravagantly for so long as this one. Deep purple flower clusters bloom from May to frost over the vigorous, ground covering foliage of 6–10". Maryland heat and drought tolerant, it is hardy in the winter to 9 degrees. They are gorgeous trailing from window boxes, hanging baskets, and any sunny spots. Trim back occasionally.

Plant 18" apart.

Zones 7 - 10

**Vernonia lettermannii**  
**'Iron Butterfly'**

**Threadleaf Ironweed**

Offering late season color and attractive Amsonia hubrichtii-like foliage, this Arkansas native is a vigorous grower and tolerant of poor, rocky soils. 3' tall fine-textured foliage is topped with small bright purple flowers in late summer. Selected from trials led by Dr. Allan Armitage at the University of Georgia and introduced by North Creek Nurseries.

Plant 30" apart.

Zones 4 - 8

**Vernonia noveboracensis**

**New York Ironweed**

This eastern U.S. native is commonly seen in wet meadows with its intense purplish-red flower clusters ablaze in late summer on 4-7' tall stems. A strong, dependable, drought tolerant plant that performs in poorly drained or well drained soil. Try it with Solidago Fireworks, Rudbeckia Goldquelle or tall native grasses.

Plant 30" apart.

Zones 4 - 8

*Creeping Veronica*

**Veronica repens 'Sunshine'**  
**Golden Creeping Speedwell**

With many choices of creeping ground covers, this cheerful and bright Veronica offers unusual chartreuse tiny oval leaves that will form a mat to 1" in height complimented by tiny blue flowers spikes in early summer. Lighting up a shady corner or path with its vivid foliage, 'Sunshine' is tolerant of light foot traffic and will thrive in full sun with adequate moisture.

Plant 8" apart.

Zones 4 - 9

**Veronica umbrosa**  
**'Georgia Blue'**

**Speedwell**

Dainty, little round sky-blue flowers in low mounds in April and May are a sweet alternative to traditional Veronica spikes. At 12" it makes a great ground cover in full sun with good drainage. Don't be deceived by its name; this hardy perennial derives from the former Soviet state, not our own southern one of the same name.

Plant 18" apart.

Zones 5 - 8

**Veronica x**  
**'Waterperry Blue'**

**Creeping Speedwell**

Tiny rounded lavender-blue flowers with dark veins dot the creeping foliage in mid to late spring and again in late summer to fall. Petite leaves are glossy green and become red-tinged in cooler temperatures. Foliage grows 5" tall. Use in the rock garden, as an edging or in containers.

Plant 15" apart.

Zones 4 - 8

**Veronica x 'Whitewater'**

**Speedwell**

Tolerant of light foot traffic but too adorable to step on when the small pure white flowers cover the glossy green foliage from early spring to mid-summer. Perfect for rock gardens or planted around flagstones, the 4-6" tall creeping foliage has scalloped leaves that turn burgundy to bronze in the fall. Prefers well-drained soil with average moisture.

PP#22783

Plant 12" apart.

Zones 4 - 7

*Upright Veronica*

Perennials

**Veronica spicata**  
**'Royal Candles'**

**Speedwell**  
Deep violet-blue spikes on this very compact Veronica don't grow over 17". The flower spikes are held well above the foliage, making them especially showy. 'Royal Candles' also drew our attention being free of problems with leaf spot, disease and insects that plague other Veronicas. It also keeps its lower leaves that are a rich glossy green.  
**Plant 18" apart.**

Zones 5 - 9

**Veronica longifolia**  
**Skyward™ Pink**  
**Long-leaved Speedwell**

We were immediately drawn to this bright pink Veronica because of its beautiful continuous dense blooming habit, and its resistance to powdery mildew. The 14 - 18" tall flower spikes of the Skyward™ series are more durable and experience less breakage than other garden speedwell. PPAF  
**Plant 18" apart.**

Zones 4 - 9

*New for 2023*

**Veronica Magic Show®**  
**'Ever After'**

**Spiked Speedwell**  
This new variety is exceptionally long blooming and self-cleaning. Lavender-blue flowers appear from early to mid-summer and nearly consume the 14-16" tall foliage. The spiky texture of this plant pairs well with the more rounded habits of Echinacea, Rudbeckia, and Leucanthemum. PPAF  
**Plant 18" apart.**

Zones 4 - 8

*New for 2023*

**Veronica Moody Blues®**  
**White**

**Spiked Speedwell**  
The functionality of white blooming perennials is endless so we have added this white Veronica to our collection. Moody Blues® White is noted for its long blooming performance and compact, well-branched habit. The foliage grows to just 12-14" tall and wide and blooms from early summer to the first frost.  
**Plant 16" apart.**

Zones 4 - 9

*New for 2023*

**Veronica x**  
**'Sunny Border Blue'**

**Speedwell**  
**Perennial Plant of the Year 1993**  
Intense, dark violet-blue flower spikes emerge from lovely, rich green, strong foliage from June through August to a height of 18" on this versatile plant. Try with Stokesia 'Peachie's Pick' and Solidago 'Golden Fleece'.  
**Plant 18" apart.**

Zones 4 - 8

**Veronicastrum virginicum**  
**Culver Root**

Topping 4-8' tall stems in mid to late summer are narrow, branched 9" spikes of white flowers that are reminiscent of a candelabra. Lance-shaped leaves grow in whorls around the tall stems. Plant at the back of the perennial border with a woodland or wall as a backdrop to the unique white flowers. Native to moist prairies, woods and stream banks of Eastern North America.  
**Plant 36" apart.**

Zones 3 - 8

**Vinca minor**  
**'Bowles Variety'**

**Periwinkle**  
'Bowles Variety' has a more mounding habit than common periwinkle because it spreads outward from the crown. Deep blue flowers appear in spring and occasionally through the summer on 4-6" tall foliage. Morning sun will produce heavier flowering. Vinca will suppress weeds, grow against trees and shrubs, and compliment spring bulbs. Performs best in fertile, loamy soil.  
**Plant 18" apart.**

Zones 4 - 9

**Zizia aurea**  
**Golden Alexander**

Perfect for native wildflower gardens or meadow plantings where butterflies will be drawn to the golden yellow lacy blooms in late spring to early summer and the vigorous foliage is allowed to spread and form colonies. Grows 24-30" tall. Prefers average to moist, well-drained soil.  
**Plant 36" apart.**

Zones 3 - 8
