A NEW PLANTING SEASON IS HERE!

Helleborus 'Spring Party', (H) No.1 – The party has started! Pinkish buds and creamy-white blooms are doing the twist above heavily mottled gray green.

Heuchera 'Berry Timeless', No.1 – Blooming now and seemingly forever are the pretty coral-pink to rose-pink bell-shaped flowers on narrow upright stems above silvery-green foliage.

Himalayan Maidenhair Fern, 1 qt. – Fresh new triangular shaped fronds are filling out the pots. Plant along walkways or in combination pots where the delicate texture can be most appreciated.

Mertensia virginica, (H) 1 qt. – Foliage is up and growing! To fully enjoy this spring ephemeral you must get them now before the clusters of lavender-pink buds and baby blue blooms begin dangling delightfully from the stems.

Sedum 'Lemon Ball', No. 1 qt. – Versatile chartreuse mounded foliage makes a great companion to pastel blooms and dark foliage alike.

Sempervivum 'Desert Bloom' & 'Saturn', (H) 1 qt. – Darling rose-tinged rosettes offer early season color and texture in the rock garden or container.

Budded and/or Blooming

Delosperma ashtonii & D. cooperi; Geranium 'Biokovo' and 'Karmina'; Helleborus 'Anna's Red', 'Dorothy's Dawn, 'Penny's Pink' & 'Pink Frost'; Mazus reptans & M. 'Albus'; Scabiosa 'Butterfly Blue'; Veronica 'Georgia Blue'.
