Achillea 'Little Moonshine', No.1 – Not to be outdone by all of the elf-sized plants on the market, 'Little Moonshine' has the same lemon-yellow flowers as its predecessor but tops out at just 12".

Budded and just plain cute!

Coreopsis Solanna™ 'Glow' No.1 – 'Moonbeam' yellow flowers are large and heavily produced on well-branched compact foliage. Very full in the pot with buds and a few happy blooms.

Heuchera 'Champagne', No.1 – Let's give a toast to this attractive Heuchera. The peach-colored new leaves are so eye-catching combined with amber to gold older leaves. Cheers!

Phlox divaricata 'May Breeze', 1 qt. – As soothing as the name...this native woodland phlox adds a calming influence to the shade garden with its mounded foliage that becomes covered with soft white flowers in spring. Budded and blooming!

Phlox subulata 'Amazing Grace', 'Drummond's Pink', 'Emerald Blue' and 'Purple Beauty', No.1 – Spring beauties in pretty spring colors for the garden in spring!

Salvia 'Rose Marvel', No.1 – We are marveling again this spring at the habit and deep rose-pink blooms of this relatively new Salvia. Expect weeks of color!
