Astilbe 'Snowdrift', No.1 – Mid-July is just the right time to be cooled down in the shade with 'Snowdrift'. Bright glossy green foliage is topped with budded and pure white blooming spikes.

Echinacea Butterfly™ 'Orange Skipper', No.1 – You just may see the Orange Skipper fluttering from cone to cone on this Echinacea! Each plant has a generous number of buds and blooms with deep orange petals that surround a bronze cone.

Echinacea 'Pica Bella', No.1 – Mauve-pink petals are just beginning to unfurl around the bronze-orange cone. Petal color intensifies as it opens, becoming a stunning deep magenta-red. Nice!

Helianthus 'First Light', No.1 – Upright foliage with narrow, stiff leaves offers texture in the sunny border in summer and loads of golden yellow flowers in late summer to fall. Full and nice.

Kalimeris 'Blue Star', No.1 – 'Blue Star' is in it's prime blooming from top to bottom with small pale blue daisy-like flowers. Pretty!

Platycodon 'Sentimental Blue', No.1 – These compact plants bloom for weeks and are perfect for the rock garden or edge of the border. Blue balloons are opening daily!

Solidago 'Fireworks', No.1 – Full-in-the-pot attractive foliage is gearing up for a show of golden-yellow sprays of flowers in late summer.

Stachys 'Helene von Stein', No.1 – Foliage as soft as a...you know...lambs ear is shimmering in the pots!

Budded and/or Blooming
