

Astilbe Music™

Drum and Bass

False Spiraea

Nicely compact and heavy flowering, this bright, **rose-pink** Astilbe will add beautiful summer color to a shady border or patio container. Dense, fluffy plumes are borne on sturdy **15 – 18"** stems in midsummer over attractive, lacy green foliage. Plant in a mass for an eye-catching display. Flowers are excellent for cutting. PP# 14964.
Plant **18"** apart.

Zones 4 - 9     

Astilbe simplicifolia

'Hennie Graafland'

False Spirea

A dwarf **16"** clear pink bloomer bears graceful, open, airy sprays of flowers in June and July. The shiny, finely cut foliage is dark green. 'Hennie Graafland' is considered a mid-to-late season bloomer thought to have a bit longer bloom time than 'Sprite'.
Plant **18"** apart.

Zones 4 - 9     

Astilbe taquetii

'Purple Candles'

False Spirea

This rugged and beautiful Astilbe is our tallest variety at **40"** or so, blooming in mid-to-late summer when drought tolerance becomes an added asset. The dense **lavender-purple** spikes may look best toward the back of the partly shaded border rising above the bronze-green foliage. By mixing different varieties, Astilbes can effectively brighten the shade garden for three months.
Plant **18"** apart.

Zones 4 - 9     

Astilbe x 'Delft Lace'

False Spirea

This beautiful Astilbe with shiny blue-green foliage will be a great addition to your shade garden. Will tolerate more sun with foliage becoming deep maroon. Burgundy stems produce salmon pink buds that open to a softer pink flower in midsummer. This hybrid has a strong upright flower spike growing **24-36"** tall. PP# 19839
Plant **22"** apart.

Zones 4 - 9     

Baptisia australis

False Indigo

Perennial Plant of the Year® 2010

This durable, long-lived native perennial produces weather-resistant, soft gray-green foliage **3-4'** high, topped in mid-spring by blue to **intense blue** flowers that last for weeks, followed by prominent dark seedpods, which all-told, make an attractive presence throughout the summer. Allow plenty of space in the garden or divide every 4-5 years in late fall to early spring. Plant **18"** apart.

Zones 3 - 9     

Begonia grandis

Hardy Begonia

If you are a shade gardener, here's yet another option for long bloom time and attractive foliage. The delicate **pale pink** flowers of the Hardy Begonia are carried above the large, rich green leaves from July to frost. Not surprising is the plant's preference for rich, moist soil. Try the **2'** mound of Hardy Begonia with contrasting fine-textured ferns or the burgundy foliage of Epimedium 'Rubrum'.
Plant **18"** apart.

Zones 6 - 9  

Begonia grandis 'Alba'

Hardy Begonia

As functional as the Hardy Begonia has proven in shady landscape spots, we think the **white-flowering** version is important to offer as well. Grows **15 - 18"**. As long blooming and bright as the white version is, its leaves seem to combine with a host of other foliage textures and shapes from Astilbes and Hostas to Polygonatum and Convallarias.
Plant **18"** apart.

Zones 6 - 9  

Bergenia cordifolia
'Miss Piggy'

Pigsqueak
Glossy, heart-shaped leathery leaves are ever-green, turning reddish shades in the fall. 'Miss Piggy' has **18"** tall bright pink flowers in spring. Prefers humus-rich soil and afternoon shade. Try with Acanthus, Dicentra and Heuchera. PP#32132
Plant 24" apart.

Photo courtesy of Walters Gardens, Inc.

Zones 4 - 9

Bergenia x 'Spring Fling'
Heartleaf Bergenia

A profusion of **magenta-pink** flowers on upright branched stems in spring are surrounded by thick glossy green leaves. The evergreen foliage turns purplish-black in fall to winter. Grows **12-24"** tall. Use as a groundcover, edger, or plant in groups in the border. PP#26337
Plant 12" apart.

Zones 4 - 9

Brunnera macrophylla
False Forget-me-not

This fine perennial Forget-Me-Not produces tiny clusters of small **pale blue** flowers from April to June. It has handsome, round, textured leaves that hold up well in the garden well into the fall. It does well in semi-shade or full sun. Its **18"** height makes it ideal for a woodland setting, for the front of the border, or as a ground cover. Try it with Heuchera Plum Pudding, Alchemilla mollis, and a yellow Hosta such as 'August Moon'.
Plant 18" apart

Zones 4 - 8

Brunnera macrophylla
'Alexander's Great'
False Forget-me-not

Side by side with its cousin 'Jack Frost', 'Alexander' boasts much larger heart-shaped leaves that are covered in metallic silver with intricate dark green veins and a thin green margin. Clumps grow **15-18"** tall and **30"** wide, accompanied by delicate (yes delicate) **sky blue** flowers in early spring. PP#25789
Plant 30" apart.

Zones 4 - 8

Brunnera macrophylla
'Jack Frost'

False Forget-me-not
Perennial Plant of the Year® 2012
Cool **blue** forget-me-not flowers dance above the silvery-white and green variegated heart-shaped leaves in April and May. The **15"** tall foliage maintains its unique variegation without reversion and will enjoy the company of Heuchera 'Citronelle' and Hosta 'August Moon'. PP#13859
Plant 18" apart.

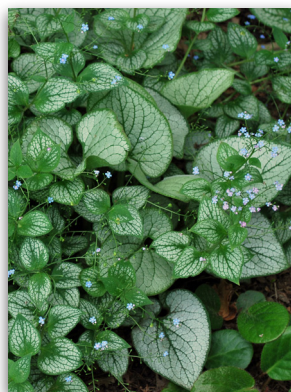

Zones 4 - 8

Brunnera macrophylla
'Sea Heart'

False Forget-me-not
Noteworthy for its exceptional tolerance of heat and humidity, 'Sea Heart' also blooms a couple of weeks earlier in spring than 'Jack Frost' and has two-toned **pink and blue** flowers. The **6-12"** tall foliage has thick leaves that are heart-shaped and green with an intricately patterned silvery overlay. PP#24684
Plant 12" apart.

Zones 4 - 8

Brunnera macrophylla
'Silver Heart'

False Forget-me-not
Thick silver heart-shaped leaves have a narrow green leaf margin and delicate green venation. Compared with other variegated varieties, it is more tolerant of heat and humidity. Pretty **blue** forget-me-not flowers top the **6-12"** tall foliage in spring. PP#24685
Plant 18" apart.

Zones 4 - 8

Calamintha nepeta 'Blue Cloud'

Calamint

You will think you have died and gone to heaven when surrounded by the 'clouds' of tiny pale blue flowers and aromatic silvery foliage. Growing to 12-15", Calamint makes a great filler plant under taller or leggy perennials. Use with Echinacea, Heliopsis, Iris, or Liatris.

Plant 12" apart.

Zones 4 - 7

Calamintha nepeta 'White Cloud'

Calamint

Literally clouds of tiny white flowers keep this tough perennial working well throughout our hot, humid summertime. Calamintha has small minty fragrant leaves, blooms from June through September, on upright stems to 18". Give it the well-drained soil it prefers. Use it in the rock garden or border where you need white to separate bright colors or blend with pastels.

Plant 18" apart.

Zones 4 - 7

Campanula carpatica 'Rapido White'

Carpathian Bellflower

Pure white flowers appear earlier in the season than other bellflowers and continue to bloom throughout the summer. The blooms look spectacular against the 5-7" tall dark green foliage. 'Rapido White' is perfect as a front-of-the-border plant or as an edging. Prefers afternoon shade in warmer zones. Deadhead to encourage re-blooming.

Plant 12" apart.

Zones 3 - 8

Campanula poscharskyana 'Blue Waterfall'

Serbian Bellflower

Captivating dark blue, bell-shaped flowers with a white center, appear mostly in June-July over green cascading foliage, perfect for dry walls, rock gardens, containers, the edges of a path, or in the front of the border. Grows 8-10" tall.

Plant 18" apart

Zones 4 - 7

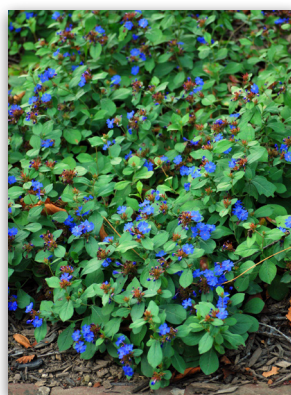

Campanula x 'Birch Hybrid'

Bellflower

A profuse blooming groundcover, nodding lavender-blue flowers begin to appear in late spring and, with regular deadheading, will continue to bloom into late summer. Foliage is bright green and 4-6" tall with serrated leaves. Combine with Coreopsis, Dianthus and Thymus.

Plant 18" apart.

Zones 4 - 7

Ceratostigma plumbaginoides

Lead Wort

A colorful and easy-to-grow perennial, Plumbago reaches just 12" in height and forms a green ground cover, with clusters of gorgeous peacock blue flowers from August into October. The foliage turns deep mahogany in fall and the brilliant flowers keep opening, which makes an eye-catching show. Excellent as a ground cover over bulbs as it breaks dormancy late in spring.

Plant 12" apart.

Zones 5 - 9

Chelone glabra White Turtlehead

The 1-2" white snapdragon-like flowers of the White Turtlehead open, just a few at a time, in late summer and autumn, and are composed of two lips like a turtle's head. A hardy native, it prefers moist soil, is 2-3' in height with glossy foliage, and attracts butterflies. Try it in a moist meadow setting or woodland. Widely grown as a cut flower in Europe.

Plant 18" apart.

Zones 5 - 8

Chelone lyonii 'Hot Lips'

Pink Turtlehead

A hardy native plant that inhabits boggy areas or the banks of streams, they prefer some shade and deep, moist soil, thus making great woodland plantings. The Pink Turtlehead has rosy-pink snapdragon-like flowers in August and September. 2-3' tall foliage with glossy leaves forms a sizable clump.

Plant 18" apart.

Zones 4 - 8

Chrysanthemum nipponicum
Nippon Daisy

Carefree when provided with well-drained soil and full sun, the Nippon Daisy is perfect in the border at 2-3', and for cutting, with its shiny foliage and big white flowers that appear in September and October. If daisies are your downfall, then why not indulge your fancy by combining our Asters, Coreopsis, Echinacea, Heliopsis, and Rudbeckia. Wow!
Plant 18" apart.

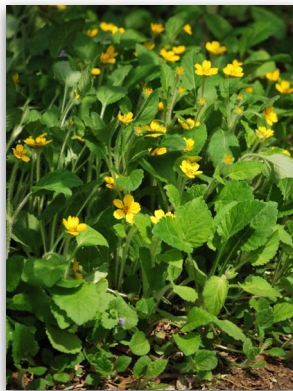

Zones 5 - 9

Chrysogonum virginianum
Green and Gold

A native woodland ground cover of the Eastern United States, 4" tall bright green foliage produces cheerful yellow star-shaped flowers on 8" stems in the spring and then sporadically throughout the summer. An excellent choice for the woodland path or naturalized area. Prefers moist, rich, well-drained soil in partial shade.
Plant 12" apart.

Zones 4 - 8

Chrysogonum virginianum
'Superstar'
Green and Gold

A vigorous selection of the native green and gold, 'Superstar' has semi-evergreen foliage and golden yellow flowers in spring. The spreading 6-8" tall foliage is a weed suppressing ground cover and perfect for under planting in the woodland or rock garden.
Plant 12" apart.

Zones 4 - 8

Chrysogonum virginianum var. australe
Green and Gold

A delightful, low growing, native groundcover with semi-evergreen foliage and yellow star-shaped flowers in late spring that continue sporadically through the summer. C. var. australe differs from the straight species with stolons that spread above ground and shorter flowering stems at just 6". Perfect for a shade garden or a naturalized woodland area.
Plant 12" apart.

Zones 4 - 8

Convallaria majalis
Lily-of-the-Valley

The old-fashioned garden favorite is a fantastic shady ground cover looking spectacular in a mass with its fragrant white bells in April and May. At about 8" in height, plants are easy to grow and will last a lifetime. A layer of organic compost applied in December or January will insure a healthy, prolific performance next spring. Try it with Lady Fern, Dicentra eximia, and Pulmonaria.
Plant 12" apart.

Zones 4 - 9

Coreopsis grandiflora
'Double the Sun'

Tickseed
This early and long blooming Coreopsis provides double the golden yellow semi-double flowers than 'Early Sunrise'. Compact foliage grows 12-14" tall and is great for containers or the front of the border. Combine with purple Salvia, Geranium 'Rozanne' and Leucanthemum.
Plant 14" apart.

Zones 5 - 9

Coreopsis grandiflora
'Early Sunrise'

Tickseed
This award-winner here and in Europe covers itself with golden-yellow, semi-double blooms from early summer into the fall, reaches 18" in height, is carefree, and provides a wealth of cut flowers, especially if spent blooms are removed. It won't need staking either, as other tall Coreopsis do.
Plant 18" apart.

Zones 5 - 9

Coreopsis grandiflora
Solanna™ Glow

Tickseed
With the lemon yellow flower color similar to 'Moonbeam' and the foliage habit of a compact 'Early Sunrise' this new Coreopsis will be right at home in the sunny border. An occasional pinching is required to promote re-blooming. Combine with classics such as Daylilies, Garden Sage and Yarrow. 10-12" tall. Tolerant of heat and humidity.
Plant 18" apart.

Zones 5 - 9

Gold = Sun, Green = Shade
(see page 6 for program details)

Queen Bee Natives

Medium Traffic

Complimentary

Coreopsis grandiflora
Solanna™ Golden Sphere
Tickseed

Make no mistake, these puffy golden yellow pom-poms belong to a perennial Coreopsis! Medium green compact foliage is topped with the fully double blooms from early to late summer. Routine deadheading will prolong the beauty. Grows 10-12" in full sun. PP#25241
Plant 12" apart.

Zones 5 - 9

Coreopsis palustris
'Summer Sunshine'
Swamp Tickseed

Towards summer's end, bright yellow flowers with dark brown cones begin to appear on upright and vigorous 3-4' tall foliage, lasting well into fall to the delight of many pollinators. Native to swampy areas of the Southeastern U.S., it prefers moist soil and tolerates extended periods of wet conditions. Disease resistant.
Plant 36" apart.

Zones 6 - 9

Coreopsis verticillata 'Zagreb'
Tickseed

This bushy 18" native Coreopsis is covered from July to September with masses of stary single flowers in a bright golden yellow with delicate fern-like foliage. Ideal for limited-space gardens, 'Zagreb' is handsome even when not in bloom, and handles average to dry conditions.
Plant 18" apart.

Zones 5 - 9

Coreopsis x Big Bang™
'Mercury Rising'
Tickseed

Deep burgundy-red velvety petals surround a yellow center on blooms that begin in early summer and continue to fall. Cold hardiness and the red flower color are due to the C. rosea parentage. In cool temperatures, flowers may be streaked with creamy white for added appeal. Grows to 15-18" and will spread up to 3'. PP#24689
Plant 24" apart.

Zones 5 - 9

Coreopsis lanceolata
Lanceleaf Tickseed

A good choice for wildflower meadows and roadside plantings where the 2-3' tall upright stems topped with single golden yellow flowers can mingle with other meadow grasses and perennials. Beneficial pollinators are attracted to the summer-blooming flowers. This tickseed will re-seed in the garden. Thrives in poor soils and is drought tolerant.
Plant 24" apart.

Zones 4 - 9

Coreopsis rosea
'American Dream'
Tickseed

A rare pink accented by a golden-yellow center, this native Coreopsis prefers moist soil, making it well suited to waterside plantings and moist locations most other Coreopsis don't like. It does have the same enthusiasm for blooming as its yellow cousins, doing so above fine, needlelike foliage of rich green to a height of 12-18" in June and July.
Plant 18" apart.

Zones 5 - 9

Coreopsis x Big Bang™
'Cosmic Eye'
Tickseed

Watch for an explosion of color when the 2" yellow flowers open, exposing a deep burgundy-red banding around a golden center. Blossoms will keep bursting from early summer into fall on 12-15" tall medium green foliage. The foliage of this Tickseed has a finer texture than C. grandiflora but not as delicate as C. verticillata. PP#22609
Plant 18" apart.

Zones 5 - 9

Coreopsis x Fall Sensation™
'Sunny Side'
Tickseed

Threadleaf foliage with an upright, open habit produces yellow blooms with pink-tipped petals from spring into fall. Height is around 12-24" and spread will be up to 30". For best performance, shear back the plant after the first flush of blooms to encourage new growth and flowers. Expect daily visits from bees and butterflies.
Plant 24" apart. *New for 2024*

Zones 5 - 9

Coreopsis x Fall Sensation™ 'Vermillion'

Tickseed

Threadleaf foliage with an upright, open habit produces **deep red** blooms from spring into fall. Height is around **24-30"** and spread will be up to **24"**. For best performance, shear back the plant after the first flush of blooms to encourage new growth and flowers. Plant in well-drained soil with average moisture.

Plant **24"** apart. *New for 2024*

Coreopsis x Li'l Bang™ 'Darling Clementine'

Tickseed

This compact threadleaf variety offers a long season of color, and is perfect for containers and the front of the border. Clementine-**orange** blooms appear in late spring, and fade to gold with repeat blooms into fall. The **8-12"** tall mounded foliage is tidy and disease resistant. PPAF

Plant **12"** apart. *New for 2024*

Zones 5 - 9

Zones 5 - 9

Coreopsis x Li'l Bang™ 'Daybreak'

Tickseed

A compact variety from Darrell Probst of Big Bang™ fame, it has the same excellent disease resistance and sterile flowers that translate to non-stop blooms all summer. **Golden yellow** flowers with intense **orange-red** centers begin blooming in early summer and continue to fall. **8-12"** tall foliage should be trimmed mid-season for maximum flowering. PP#27138

Plant **15"** apart.

Coreopsis x Li'l Bang™ 'Starlight'

Tickseed

A beauty from early summer to fall, the large blooms in the beginning and middle of the season are **white** with a **burgundy** starburst eye and as temperatures cool, the flowers become streaked with **burgundy-rose**. A couple of trims will keep plants tidy and long-blooming. **12"** tall foliage is quite disease resistant. PP#28005

Plant **15"** apart.

Zones 5 - 9

Zones 5 - 9

Coreopsis x 'Tequila Sunrise'

Tickseed

You'd think the vibrant foliage of this Coreopsis would be startling enough, but add the delightful **bright yellow** single flowers with a **reddish-brown** eye that appear in May and June, and you have a unique new hybrid for the garden. The leaves in spring have a pinkish-red tint as well as cream and yellow. Grows **15"** tall. PP#9875

Plant **18"** apart.

Coreopsis x UpTick™ Gold & Bronze

Tickseed

A show-stopper for sure, this new variety has very large **golden-yellow** flowers with a prominent **bronze-red** eye. Compact **14-16"** tall foliage is topped with the eye-catching blooms from late spring to late summer. Deadheading encourages a better bloom performance and helps keep plants tidy. PP28882

Plant **18"** apart.

Zones 5 - 9

Zones 5 - 9

Delosperma cooperi Trailing Hardy Ice Plant

Rosy-pink daisies are produced from June through September above a dense mat of succulent foliage that hugs the ground no more than **3"** high. Easy to grow and drought-tolerant, it is lovely cascading over a wall, edging the front of the border, as a ground cover, or as a container plant.

Plant **18"** apart.

Delosperma 'Fire Spinner' Ice Plant

Bring vibrant color to the walkway or rock garden with this fast spreading succulent ground cover. Head spinning multi-colored flowers have bright **orange** petals that are **purplish-pink** toward the center and surround a white eye. The **2"** tall light green succulent foliage is covered with blooms in late spring to early summer. A 2012 Plant Select Winner.

Plant **18"** apart.

Delphinium Delgenius™ Series

Larkspur

Robust 18-24" tall flower spikes stand confidently strong in the container or garden without fear of toppling! Flowering occurs on multiple stems per plant and will re-bloom after spent blooms are cut back. A cottage and cut flower garden delight! Prefers moist, well-drained soil.

Plant 24" apart.

Zones 3 - 8

Dianthus allwoodii 'Frosty Fire'

Garden Pinks

Semi-double deep, dark pink (almost red) fragrant flowers grace the blue-gray foliage of this 6-8" plant most prolifically in June, and then off and on through the rest of the summer. Given good drainage and a spot at the front of the border, this Canadian Ornamental Plant Foundation introduction will perform well for us right here in the mid-Atlantic.

Plant 18" apart.

Zones 5 - 9

Dianthus x EverLast™ White + Eye

Garden Pinks

These double whites with bright pink eyes bloom an incredible long time in the garden and containers! The first flush of flowers appear in early spring and continue to bloom all summer long. After a trim, another round of flowers can be expected in fall. Very floriferous and wonderfully scented. Compact foliage grows to 8-12" tall. PP#27845

Plant 12" apart.

Zones 5 - 9

Dianthus gratianopolitanus 'Firewitch'

Garden Pinks

Perennial Plant of the Year® 2006

A favorite for its reliable performance throughout the growing season! Magenta single-petal blooms at 8-10" will fill your garden in May and June with their lovely fragrance. This long-bloomer has blue-green foliage, needs excellent drainage, and prefers alkaline soil.

Plant 18" apart.

Zones 3 - 8

Dianthus x Beauties®

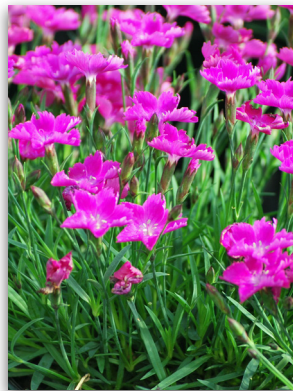

'Annabelle'

Garden Pinks

Place this very fragrant pure **white** Dianthus in containers or in the front of the border near doorways and walkways to fully enjoy the spicy scent. Long blooming 'Annabelle' is also a must for the white garden. The compact gray-green foliage grows **4-6"** tall, and is heat and humidity tolerant. Sheer back plants after first blooms in summer to promote fresh new growth and flowers. **Plant 12"** apart.

New for 2024

Zones 4 - 8

Dianthus x Beauties®

'Kahori'

Garden Pinks

Expect an incredible number of blooms throughout the summer on compact **4-6"** tall plants with foliage that continues to look fresh and unstressed. Grassy green foliage is covered with clove-scented **dark pink** flowers from late spring to late summer. An occasional light shearing keeps plants looking tidy and promotes flowering. Great for vivid color in small containers, on the edge of the border or in rock gardens. PP#21016

Plant 12" apart

Zones 4 - 8

Dianthus x Mountain Frost™

Pink PomPom

Garden Pinks

Compact mounded foliage has petite fragrant double **rose-pink** flowers from spring to fall. Pinching spent flowers will keep plants tidy and encourage more blooms. Grows **6"** tall in full sun and is tolerant of a little extra moisture. Try with Coreopsis 'Citrine', Salvia 'Blue Marvel' and Veronica 'Whitewater'.

Plant 12" apart.

Zones 5 - 9

Dianthus x Premier™

Hello Yellow®

Whetman® Pinks

The fragrance is as lovely as the pastel **yellow** double blooms it wafts from, making 'Hello Yellow' deserving of a spot in the front of the border. Flowering begins in spring atop **8-11"** tall silvery-blue foliage and continues into summer. For a spring to summer combination use with Allium 'Millenium', Campanula 'Blue Waterfall' and Salvia. Zones 4 - 9

**Dicentra eximia
Cutleaf Bleeding Heart**

Myriads of heart-shaped rose-pink flowers stand 2-4" above grayish-green fern-like foliage, starting in May and continuing well into the fall. Effective by itself or in mixed plantings, this woodland native reaches 12-18" in height and does well in shade or sun. In the shady garden try it with Astilbe, Pulmonaria, blue or green leaved Hostas, and ferns. Plant 18" apart.

Zones 4 - 9

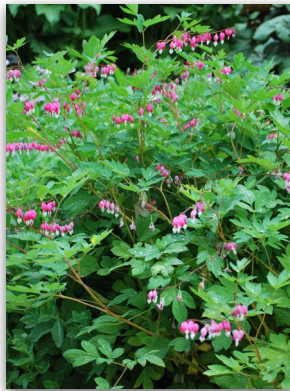

Dicentra formosa

**'Luxuriant'
Cutleaf Bleeding Heart**

When given the moist, partly shaded areas it prefers, 'Luxuriant' will not stop blooming from May through September. Its deep rose pink hearts appear in clusters on stems rising a few inches above its ferny green foliage. It tolerates more sun and heat, but will still flower heaviest in spring and fall. Height is 12-18". Plant 18" apart.

Zones 4 - 9

Dicentra spectabilis

Old Fashioned Bleeding Heart

A garden favorite for years, it's fairly tall at 3', and has evenly spaced pink hearts suspended gracefully on its long stems. It prefers no direct sun and blooms happily in April and May. Remember that it may go dormant in mid-summer. Try under planting with ferns, Mertensia, or ground covering shade lovers such as Tiarella 'Running Tapestry' or Creeping Phlox. Plant 18" apart.

Zones 4 - 9

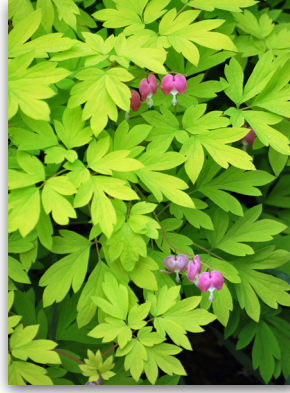

Dicentra spectabilis 'Alba'

Old Fashioned Bleeding Heart

While it is the white version of the Old Fashioned Bleeding Heart, the pendulous blooms are exquisitely delicate and the white color gives the plant a different aura. You won't tire of this spring sight in your shade garden, especially if used in a mass. Height is 3'. Try with Hosta 'Fire and Ice', Japanese Beech Fern and Brunnera 'Silver Heart'. Plant 18" apart.

Zones 4 - 9

Dicentra spectabilis

**'Gold Leaf'
Bleeding Heart**

Golden yellow foliage forms a bright contrasting backdrop for the dangling rose-pink heart-shaped flowers that bloom in mid to late spring. Forms a bushy upright mound to 36" tall. Prefers average to moist, well-drained soil. Plant 18" apart.

Zones 4 - 9

Dicentra x Amore™ 'Titanium'

Bleeding Heart

Lacy bluish-green foliage is a complimentary backdrop to the bright white flowers that appear from spring to fall! This long blooming bleeding heart has excellent heat tolerance, and has a lovely presence in the woodland garden or shady border. Much more compact than Decentra spectabilis 'Alba' with 9" tall foliage and 14" tall flowering stems. PPAF Plant 18" apart. *New for 2024*

Zones 5 - 9

Photo courtesy of TERRA NOVA® Nurseries, Inc.

Digitalis purpurea
'Candy Mountain'

Foxglove
The stunning **rose-pink** early summer blooms are bell shaped with upward-facing freckled throats that are visible all around the stems. 'Candy Mountain' is a very sturdy and erect variety that grows to **3-4'** tall. What a classic and wonderful addition to the cottage garden!
Plant 18" apart.

Zones 4 - 8

Digitalis purpurea
'Candy Mountain White'

Foxglove
Common foxglove, native to the British Isles and found frequently in the English cottage garden, is a treasure in gardens on this side of the pond as well. The tubular **white** flowers of this foxglove have purple speckled throats and face upward. Blooms on **24-48"** tall strong stems. Prefers rich, consistently moist soil.
Plant 18" apart.

Zones 4 - 8

Digitalis purpurea
'Dalmatian Peach'

Foxglove
Sturdy spikes hold outward-facing **peachy-pink** flowers with **orange** speckled throats. First-year flowering **2-3'** tall spikes emerge from a tight clump of basal foliage in early summer attracting hummingbirds or scissors for the cut flower arrangement.
Plant 18" apart.

Zones 4 - 9

Digitalis x 'Arctic Fox Rose'

Foxglove
Beautiful **rose-pink** flowers with pale pink speckled throats are held on upright **18-24"** stems from late spring to late summer. 'Arctic Fox Rose' offers first year flowers and summer-long blooms for the mid-Atlantic and New England. Remove spent stems to encourage new growth. Bunnies will stay away as will deer.
Plant 18" apart.

Zones 4 - 9

Digitalis x Pink Panther®

Foxglove
First year flowering foxglove? Early flowering? Multiple blooming stems at one time? Non-self-sowing sterile seed? Is there such an elusive Digitalis? Yes...Pink Panther®! **18-22"** tall heavily branching plants hold long-lasting bright **purplish-pink** flowers in spring to summer. "Until we meet again and the case is sol-ved."
Plant 18" apart.

Zones 5 - 9

Echinacea purpurea
'Magnus'

Purple Coneflower
Perennial Plant of the Year® 1998
Akin to the Black Eyed Susan for their easy-to-grow, healthy, disease-resistant habit and looks, native Purple Coneflower bears large, daisy-like blooms of bright rosy-pink with flat petals from July through September to a height of **3'**. The large cone of seeds at the heart of the flower starts out a coppery orange, and then turns black as the seeds mature. **Plant 18" apart.**

Zones 3 - 9

Echinacea purpurea
'PowWow White'

Coneflower
This compact coneflower is just under **2'** tall and produces many large blooms with **pure white** petals surrounding a bronze-yellow cone. Very hardy with a well-branched habit, providing a nice alternative to taller varieties. Place in the middle of the border or in combination containers. Blooms from late spring to late summer.
Plant 18" apart

Zones 3 - 9

Echinacea purpurea
'PowWow Wild Berry'

Coneflower
Not just another purple coneflower! Exceptional blooming habit with many flowers produced on the compact, **20-24"**, well-branched plants from late spring to late summer. The **3-4"** diameter flowers have deep **rose-purple** ray petals surrounding a rose-tinted dark orange cone and retain color longer than its cousins. Sturdy stems will not require staking.
Plant 18" apart.

Zones 3 - 9
